

Cognito filled a gap. We needed to know what we didn't know, and Cognito showed us what was hidden.

Brett Walmsley

CTO

Bolton NHS Foundation Trust

Vectra is a great product. They have a unique approach to identifying threat and malware on your network. The network centric approach that Vectra has, has been really key for us to get that threat analysis and awareness.

Robert Riviera

Senior engineer

Watch the video

With Vectra, I don't have to sift through endless logs to identify real threats. Cognito Detect automates detection and response, which gives me more time to investigate and hunt for threats using Cognito Recall.

Riwan Majeed

ICT Security Manager

Vectra is a proven bit of technology. I've been really impressed with the Office 365 visibility. Some of this information we've been grabbing off of it has been really really useful to see.

Kevin Orritt

ICT Security Manager
GMMH NHS Foundation Trust

Vectra is very quick to see what you need to deal with first. The user interface captures all alerts and shows you which ones are critical. Vectra picks up a lot of traffic going across the network, scores everything and puts it into different categories. I know exactly which ones need dealing with first.

Kevin Orritt

ICT Security Manager GMMH NHS Foundation Trust

Cognito proved its value from Day 1.
After a short period of supervised and unsupervised machine learning across our entire network, Cognito immediately detected a threat and notified our security team about an attack.

Group Security Architect

You don't know what you don't know. I didn't know what was out there. I didn't know what was running across our network. I did not have visibility.

Vectra opened my eyes.

Malcolm Montague

Watch the webinar

Vectra protects businesses by seeing threats and stopping attacks across cloud, data center, IoT and enterprise with Al-driven network detection and response.
