

What our customers say about the Vectra services team and implementation

The Vectra team is nice and helpful. The service desk is fast. They know what they are doing. We have a customer service person who knows about our environment and can ask in-depth questions. He came over as well for the implementation to check it. The work was well done.

Cyber Security Analyst

Financial Services Firm

What our customers say about the Vectra services team and implementation

We had very knowledgeable people from Vectra work with our networking group to get the correct traffic to its sensors. This was done remotely and virtually, but it was done very well.

Eric Weakland

Director, Information Security American University What our customers say about the Vectra services team and implementation

Once every quarter, they'll put health and safety in, and say, "Alright, these are the new functions. This is what you need to turn on. That's not quite working. Those haven't fired. You might want to look at removing those."

This is really good to see, because I get a lot of vendors, who once they've sold you a technology, they don't really care. They don't look at what you installed, how you've installed it, provide any recommendations, or look at how it's performing.

Vectra provides me the assurance my SOC guys are doing a good job, we are on top of any changes and the assurance we are getting the most of the solution.

Head of Information Security

Insurance Company

What our customers say about the Vectra services team and implementation

Vectra is very clean and easy to use. Everything we need is right here. You quickly understand how to use Vectra and deploy it.

IT security administrator Tri-State Generation and Transmission Association What our customers say about the Vectra services team and implementation

Cognito was key in our journey. We started with the network because Cognito is easy to install and we get immediate visibility into attacker behaviors that hide in traffic.

Carmelo Gallo

Cybersecurity Manager ED&F Man Holdings Ltd. What our customers say about the Vectra services team and implementation

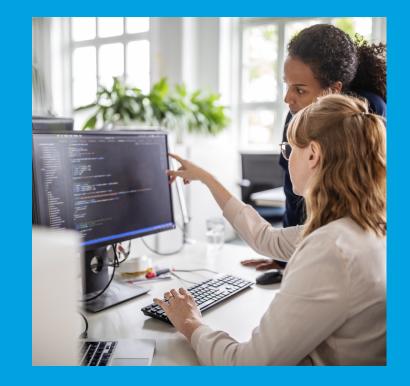

Vectra was up and running quickly. It was easy to use and the graphical dashboard was very intuitive to navigate. You don't have to be a cybersecurity expert to use Vectra.

Head of Security

Global financial services firm

What our customers say about the Vectra services team and implementation

The initial setup was completely straightforward. I didn't need any help. The system is preconfigured from Vectra. I placed it in the server home, configured the network, and moved the Internet traffic out of the mailboxes. Then I put it onto the network so it was visible. In 30 minutes to an hour, everything was running.

Project Manager

University

What our customers say about the Vectra services team and implementation

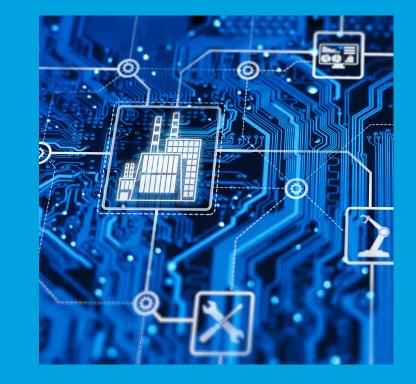

The deployment was quick and easy. The onboarding and training was straightforward compared to other systems we've deployed that require a lot of time and effort to implement and configure.

Kevin Orritt

ICT security manager Greater Manchester Mental Health What our customers say about the Vectra services team and implementation

Vectra protects businesses by seeing threats and stopping attacks across cloud, data center, IoT and enterprise with Al-driven network detection and response.
