

# What our Detect for O365 customers are saying

Vectra is a proven bit of technology. I've been really impressed with the Office 365 visibility. Some of this information we've been grabbing off of that has been really really useful to see.

## **Kevin Orritt**

ICT Security Manager GMMH NHS Foundation Trust

By using valuable tools, like for example Detect, Recall, and Detect for Office 365, we are clearing the fog and seeing new things.

**Operational Security Manager** *Financial Services* 

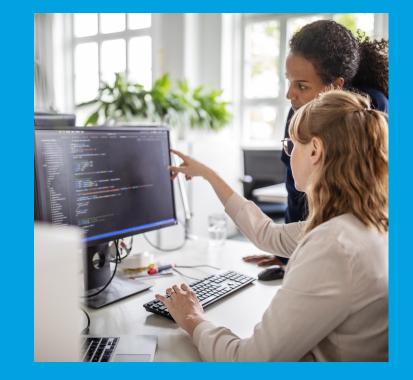

O365 is great, it's simple to understand. In fact, we are receiving all the logs from O365 to our SIEM. we gain more value within two weeks or three weeks or even one month. We are seeing things. In fact, things we were not able to see before. For example: new logons, strange logons of guys that are you know, setting up synchronization with OneDrive or things about SharePoint sharing.

#### What our Detect for O365 customers are saying

**Cognito for Office 365 is a windfall in light of** how attackers are compromising and taking over accounts. As a long-time Vectra customer, I have confidence in identifying and stopping privilege escalation and account takeovers in Office 365.

**John Shaffer** 

CIO

Greenhill

Cognito for Office 365 is very important to us as well as to our own customers.

### Hidenori Okumura

Product Manager of Corroboration Platforms Nissho Electronics Corp

What our Detect for O365 customers are saying

Before we deployed Vectra, we had limited visibility into malicious behaviors inside network traffic or Office 365. We're impressed by what we can now see.

## Kevin Orritt ICT Security Manager GMMH NHS Foundation Trust

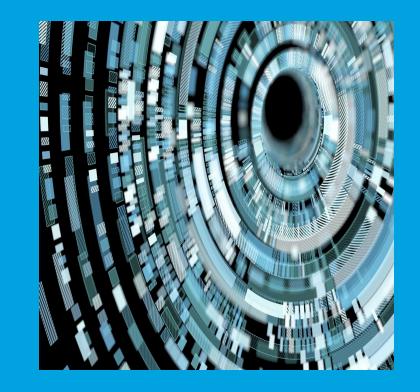

Vectra gives us much better visibility into threat behaviors across our entire deployment. We now have a greater degree of confidence that we can detect and stop credential abuse that has become common in Office 365.

## **Kevin Orritt**

ICT Security Manager GMMH NHS Foundation Trust

Vectra gives all the necessary threat information to our SOC analysts. Cognito for Office 365 is priceless.

Financial Services

#### What our Detect for O365 customers are saying

If we didn't have Vectra and the Detect for Office 365, it would be very difficult to know if our Office 365 was compromised.

**Operational Security Manager** 

Financial Services

The Detect for Office 365 gives us a lot of visibility and I'm very pleased with the tool.

**Operational Security Manager** *Financial Services* 

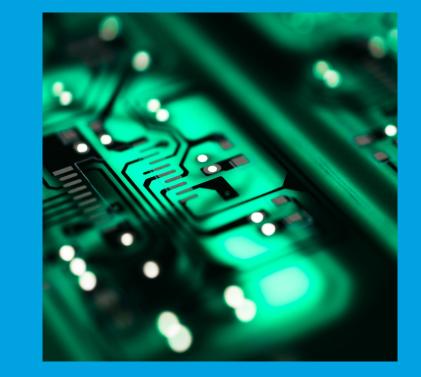

The key feature for me for Detect for Office 365 is that it can also concentrate all the information and detection at one point, the same as the network solution does.
