

Vectra, by far, in terms of detection tools is number one. Hands down. ____

John Byun

Global Retailer

Vectra clearly outperformed ExtraHop. Vectra detected red team activity during the proof-of-concept. That was the first time we ever detected a threat.

With Vectra, what used to take months now takes minutes. There's no need to sort through massive volumes of logs and chase down every single alert.

"I can easily see where attackers are hiding and what they're doing. The important details are always at my fingertips."

Information Security Architect

Beauty Industry Retailer

We've been a customer of Vectra for four years now. We've kind of grown with the product. And we believe behavior detection is definitely something we need to augment the signature detections we have in place.

Alex Attunmalil

Director of Global Security Under Armour

Vectra offered excellent visibility about what attackers do inside the network.

Gustavo Ricco

Security Operations Manager Fenaco Informatik

The integration between Vectra and Splunk was so simple and easy that we were able to get up and running in the SOC very quickly. Now we look at Vectra for the most critical alerts and we send syslogs and metadata to Splunk for investigations.

The Cognito platform exposed red team behaviors in a very short time, We realized that this would enable us to respond quickly to mitigate real threats.

Daniel Luttermann

Security Team Lead ROSSMANN IT

The Vectra Threat Certainty IndexTM automatically prioritizes detections so it's easy to see the most critical threat behaviors. For us, it consolidates hundreds of events and historical context to pinpoint host devices that pose the biggest threat.

Daniel Luttermann

Security Team Lead

ROSSMANN IT

It sends a strong, high-fidelity threat signal, there's no noise, and no alert fatigue. If a critical detection appears in the dashboard of the Cognito UI, we know it's worthy of our attention.

Daniel Luttermann

Security Team Lead ROSSMANN IT

I can't really say anything more other than it's an absolute requirement for us. We cannot live without [Vectra].

John Byun

Global Retailer

I'm a huge fan of Vectra and what it's done for us. It's completely transformed our security detection capabilities.

John Byun

Global Retailer

There are three parts of security: protection, detection, and remediation. I put more emphasis on detection more than anything else... the only way you're going to stop sophisticated actors is if you detect them.

John Byun

Global Retailer

Vectra protects businesses by seeing threats and stopping attacks across cloud, data center, IoT and enterprise with Al-driven network detection and response.
