Product(s): Vectra Cognito Platform

Overall Comment: "The overall experience with Vectra AI was great, from evaluation to procurement we had a team that listened to the challenges and was able to show how their solution could meet the changing techniques been used to detect avenues of attack. The team ensured a smooth deployment by supporting the business through every stage. I would have no hesitancy in recommending Vectra. "

Lessons Learned

What do you like most about the product or service?

The ability to detect cyber attacks in real time which gives us the information to respond in near real time across the network including the IOT environment, The network meta-data feeds detection and response tools, also giving the ability to do retrospective threat hunting.

What do you dislike most about the product or service?

The reporting element like all solutions needs a bit more work.
